Informed Consent For Dilating Eyedrops

PATIENT'S NAME: _____

PATIENT CONFIRMATION

Dilating drops are used to dilate or enlarge the pupil of the eye to allow the ophthalmologist to get a better view of the inside of your eye.

Dilating drops frequently blur vision for a length of time which varies from person to person and may make bright lights bothersome. It is not possible for your ophthalmologist to predict how much your vision will be affected. Because driving may be difficult immediately after an examination, it's best if you make arrangements not to drive yourself.

I hereby authorize Dr. Richardson and/or assistants as may be designated by him to administer dilating eye drops. Eye drops are necessary to diagnose my condition.
